

Numération

Correction

Décompose ces fractions au maximum puis trouve les nombres décimaux auxquelles elles correspondent :

$$\frac{123}{10} = \frac{100}{10} + \frac{20}{10} + \frac{3}{10} = 10 + 2 + \frac{3}{10} = 12,3$$

$$\frac{654}{1000} = \frac{600}{1000} + \frac{50}{1000} + \frac{4}{1000} = \frac{6}{10} + \frac{5}{100} + \frac{4}{1000} = 0,654$$

$$\frac{65}{10} = \frac{60}{10} + \frac{5}{10} = 6 + \frac{5}{10} = 6,5$$

$$\frac{68}{1000} = \frac{60}{1000} + \frac{8}{1000} = \frac{6}{100} + \frac{8}{1000} = 0,068$$

$$\frac{235}{10} = \frac{200}{10} + \frac{30}{10} + \frac{5}{10} = 20 + 3 + \frac{5}{10} = 23 + \frac{5}{10}$$

$$\frac{7654}{1000} = \frac{7000}{1000} + \frac{600}{1000} + \frac{50}{1000} + \frac{4}{1000} = 7 + \frac{6}{10} + \frac{5}{100} + \frac{4}{1000} = 7,654$$

$$\frac{43}{10} = \frac{40}{10} + \frac{3}{10} = 4 + \frac{3}{10} = 4,3$$

$$\frac{25}{1000} = \frac{20}{1000} + \frac{5}{1000} = \frac{2}{100} + \frac{5}{1000} = 0,025$$
